

# Privacy and Safety Policy

Poly Sell commits itself to ensure that your privacy is protected. Requested information that may identify you will be used in accordance with this declaration of privacy.  
Poly Sell can change this policy from time to time, by updating this page.

## What we request

We can request the following information:

- name,
- e-mail address,
- name of company where you work.

## What we do with the obtained information

The supplied information will be used to reply to your specific request, just like answering a query, unless you give us permission to use it otherwise, as for example, adding it to one of our lists for sending of newsletters about new products, special offerings or other information that we believe you may deem interesting.

## Security of access to information

We promise to ensure that your information will be safe. So as to impede unauthorized access to it or its diffusion, we have established adequate physical, electronic and managerial procedures to protect it.

Among these procedures, the use of SSL (Secure Socket Layer) certificate is found. SSL is a security protocol that protects communications performed through the Internet. It creates an encrypted channel between a web server and a computer connected to it to ensure that all transmitted data are secret and safe, impeding hackers and malicious software from reading or modifying any transferred information. Internet users can recognize that a site is safe upon seeing a lock.

## Cookies

A cookie is a small file that asks for permission to be installed on your computer's hard disk for the purpose of helping analyze your traffic in the web. Once you have given the permission, a web application can adapt your behavior to your known needs and preferences, based on the sites you visit.

We do not use cookies.
