Product - DETER SELL-CB®

Product Data

DETER SELL-CB® is a descaling detergent with neutral pH and proven superior cleaning power, developed for veterinary and industrial use and available in 1, 5 and 20-liter packs.

POLY SELL® recognized a few years ago the shortage of veterinary and industrial markets for a detergent compound with high cleaning powder and with some desirable and unique characteristics in its formula which, after a period of intense research and development, can now be found in the product DETER SELL-CB®:

Neutral pH

Only neutral pH descaling detergent registered in MAPA [Ministry of Farming, Livestock & Food Supply].

Fully Biodegradable

Without negative impacts on the environment.

Non-Chlorinated

It can be used on any type of equipment/surfaces, not having corrosive power over them.

Easy to Apply and Rinse

Perfectly possible application with basic equipment such as watering cans and buckets. Easy and fast rinse.

Excellent Cost-Benefit Ratio

High cleaning power with low cost.

The use of DETER SELL-CB® promotes:

- Increase in the service life of installations and equipment.
- Better performance of Disinfectants.
- Reduction of cost with antibiotic therapy.
- Removal of 3 to 4 logs of microorganisms.
- Reaches critical points (grooves and porosities), avoiding the formation of biofilms.
- Reduces the challenge of diseases (break of the infection cycle).
