## Produtos Químicos Ltda.

### Product – POLYQUAT 40®

POLYQUAT 40® is the trademark of the product AVT-40® marketed in Colombia

#### Product Data

POLYQUAT 40® is a disinfectant and detergent compound based on quaternary ammonia and chemical enhancers for veterinary and industrial use and available in 1, 5, 20 and 50-liter packs.

This product was created by the research and development sector of POLY SELL® aiming to obtain a disinfectant compound with high germicidal action and outstanding detergent power, as well as other desirable characteristics that were successfully achieved in POLYQUAT 40®:

#### Advanced Formula

High germicidal and detergent power.

#### Safety

POLYQUAT 40® is a highly safe product, since the compounds used in its formula are approved for use in cleaning and disinfection of food industries by the FDA. - Food And Drug Administration.

Eco-Friendly (Biodegradable) Product:

Differentiated formula that reduces possible impacts to the environment. Excellent Cost-

Benefit Ratio:

High efficiency with low cost.

#### Poultry Farming

Cleaning of sheds: POLYQUAT 40® at a dilution of 1:1000. Use water under pressure (no need to rinse).

Cleaning and disinfection of equipment (feeders, drinking troughs, etc.): wash and disinfect equipment with POLYQUAT 40® at a dilution of 1:1000.

## Produtos Químicos Ltda.

Disinfections of facilities: use POLYQUAT 40® at a dilution of 1:1000. Wet the entire facility. In case of high viral challenge, use POLYQUAT 40® or POLY-PHEN®.

Cleaning of hanging drinking troughs during breeding: add 10 ml of POLYQUAT 40® in a bucket with 10 liters of water.

Wash and disinfect the hanging drinking troughs.

Cleaning the water tank and system: drain the tank, clean the entire inner surface, refill the tank and add 1 liter of POLYQUAT 40® for every 500 liters of water. Fill the entire system, allow it to rest and drain in 12 hours.

### Pig Farming

Cleaning of sheds: apply POLYQUAT 40® at the dilution of 1:1000. Use water under pressure (no need to rinse).

Cleaning and disinfection of equipment (feeders, drinking troughs, etc.): wash and disinfect equipment with POLYQUAT 40® at a dilution of 1:1000. - Disinfection of facilities: Use POLYQUAT 40® at a dilution of 1:1000. Wet the entire facility. In cases of high viral challenges, use POLYQUAT 450® or POLY-PHEN®.

Cleaning the water tank and system: drain the tank, clean the entire inner surface, refill the tank and add 1 liter of POLYQUAT 40® for every 500 liters of water. Fill the entire system and drain in 12 hours.
