Product - AVT-GEL®

Product Data

AVT-GEL® is a highly effective antiseptic product, indicated for disinfection of the hands in any place where this process becomes necessary. Antiseptic Gel for dry sanitation of the hands, AVT-GEL® does not require rinsing, eliminates 99.99% of microorganisms that are harmful to the skin without damaging the natural flora. It contains emollients that prevent dryness and moisturize the hands. Available in cylinder packaging of 5 liters.

Antiseptic Efficacy: proven action before ***Staphylococcus aureus***, ***Salmonella s.p.*** In comparison with common alcohols in the market, it presents greater biocidal power and broader spectrum of action.

It prevents cross infection: eliminates the transmission of bacteria through the hands or contact with contaminated surfaces, reducing the possibility of contamination.

Formula with moisturizer: it contains emollients for reconstitution of the hands, avoiding dryness caused due to constant use of common gel alcohol

ANVISA: AVT-GEL® is registered in compliance with the strict standards of ANVISA (Ministry of Health).

Advanced Formulation: formulated with high quality raw materials, AVT-GEL® presents ideal transparency and consistency for use, with higher performance.

For right sanitation of the hands

- 1 - Apply AVT-GEL® on the hands.
- 2 - Scrub the palm of the hands and the thumb.
- 3 - Scrub the back of the hands with the fingers intertwined.
- 4 - Scrub the tip of the fingers at the joints of the phalanges.
- 5 - Scrub the wrists with the hands. 6 - Done, your hands are sanitized and moisturized.

OBS.: For every four sequential uses of AVT-GEL® (in 15-minute intervals) it is recommended to wash the hands with the antiseptic shampoo and liquid soap Deter Sell® CID.
